Overview

Help us determine if there are any pneumonia symptoms in the images we provide.

Steps

1. Examine the image.
 2. If there are pneumonia symptoms in the image, check the appropriate box.
 3. If **other** symptoms are present that are not on the list, type the name of the symptom into the text box.
 - Use the plus icon next to the text box to add another line.
 - Put one pneumonia symptoms on each line.
-

Rules Tips

Rules:

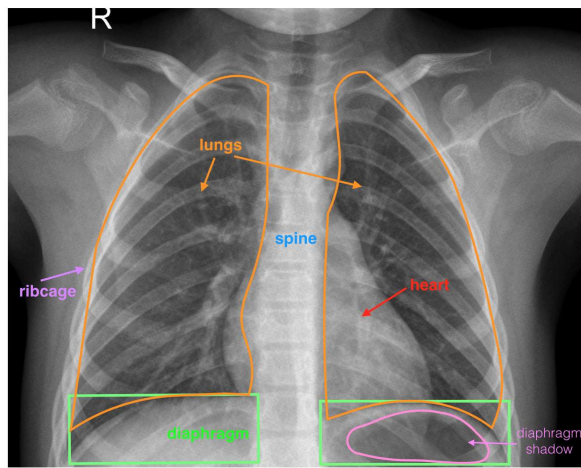

The post can be classified as **yes, no, or unknown**:

- Only look for pneumonia symptoms
- If there are multiple symptoms of the other category present, you only need to add the symptoms once

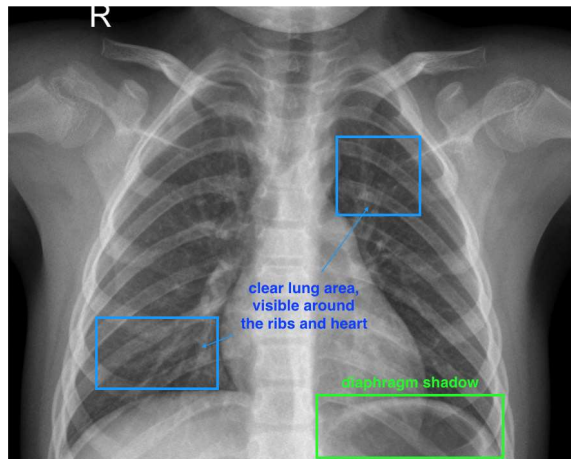

Tips:

- If the image is animated, make sure to watch the whole thing before answering!
-

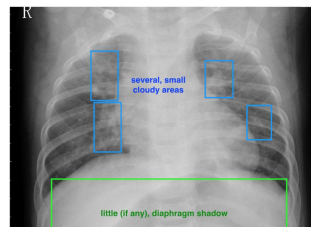

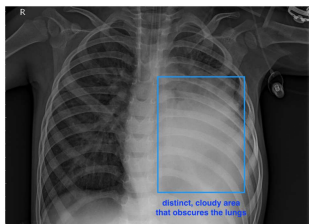

Examples

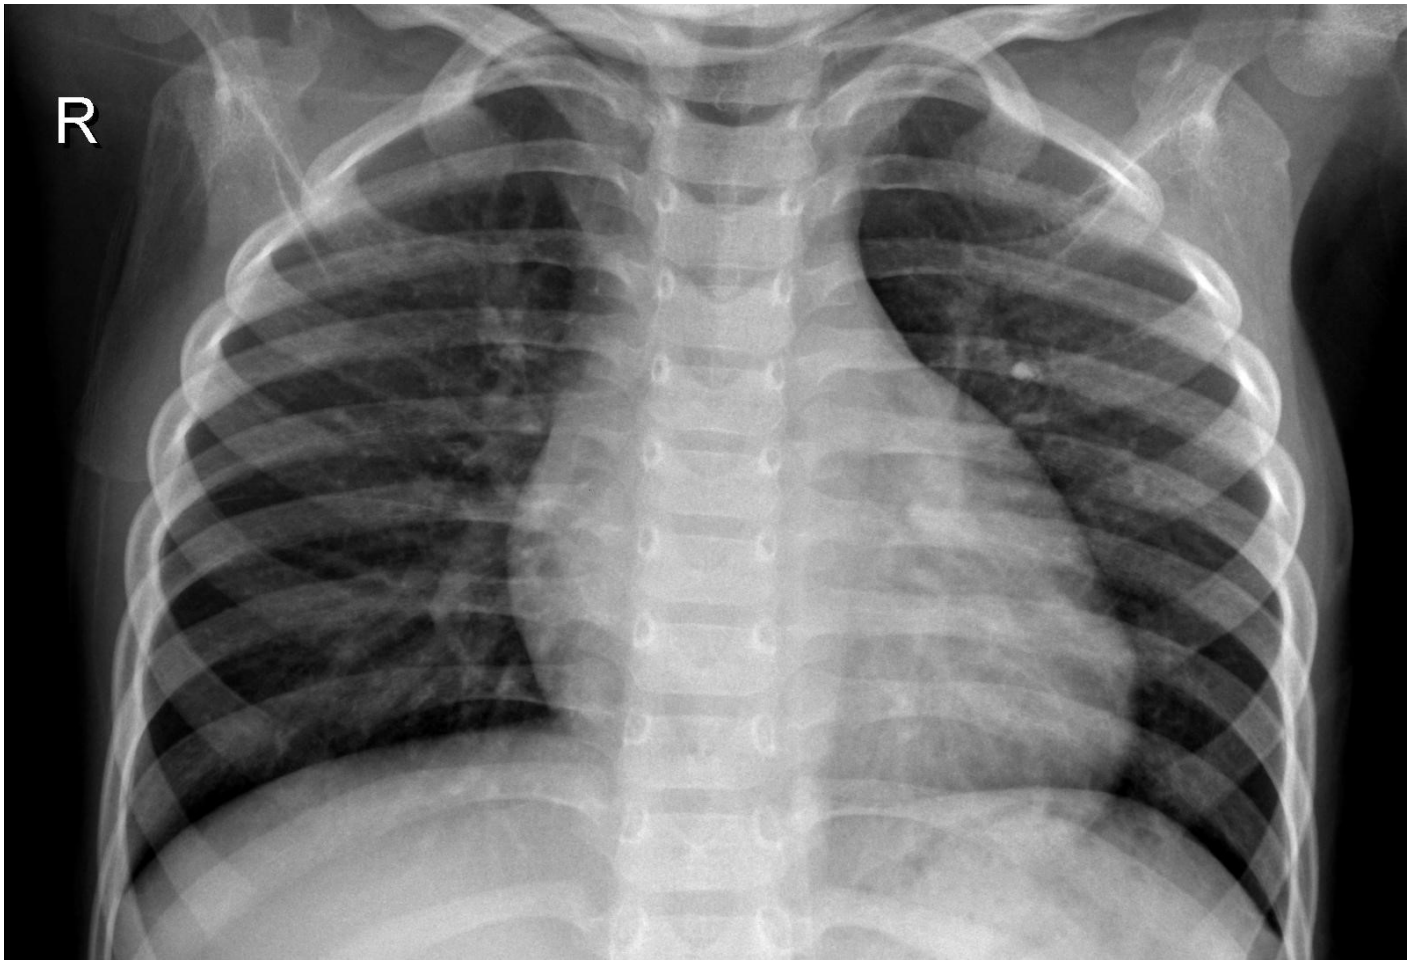

A labeled, healthy, chest x-ray image. Pay close attention to the two lungs and diaphragm (below the lungs).

Some characteristics of a healthy image: a clear lung area.

Examples of pneumonia symptoms: (Left) a concentrated, opaque area in the lungs, (Right) multiple, smaller opaque areas throughout the lung area and any diaphragm shadow is obscured.

Are there hazy areas representative of pneumonia present in this image? (required)

- ☐ Yes
- ☐ No
- ☐ unknown
